

EpiQuercican™

Reconstructive Formula with cellular nutrients for supporting cell protection and normal cell function

The human body consists of billions of cells. New cells are constantly being formed to permit growth processes and to replace old, necrotic or damaged cells. These processes are subject to strict control mechanisms in which the immune system plays a part.

New somatic cells arise through cell division. In this process they have to dissolve the collagen matrix and the connective tissue surrounding it in order to be able to grow and expand. For this purpose, cells secrete special types of enzymes that digest collagen. The secretion of these enzymes is likewise strictly controlled in our bodies, so that despite this brief process period the

maintenance and stability of the connective tissue are not subsequently impaired.

Vitamin C, lysine, green tea extract and other micronutrients (cellular nutrients) promote and support the normal functioning of the cells, the natural stability of the connective tissue and its protection. In addition, they contribute to the optimum functioning of the immune system and promote the formation of stable connective tissue.

EpiQuercican™ is a Reconstructive Formula in the Dr. Rath Cellular Nutrient Programme. The ingredients in EpiQuercican™ support cellular metabolism in many ways simultaneously, e.g.:

- As a contribution to protecting the cells against oxidative stress with vitamin C, selenium and copper
- For supporting the functioning of the immune system with selenium, copper and vitamin C
- For supporting the normal formation of connective tissue with copper, manganese and vitamin C

Contents of one capsule:

Vitamin C obtained from:		
Ascorbic acid	41.7	mg
Calcium ascorbate	34.2	mg
Magnesium ascorbate	25.0	mg
Ascorbyl palmitate	17.5	mg
L-lysine	166.7	mg
L-proline	125.0	mg
L-arginine	83.3	mg
Green Tea Extract (80% Polyphenols/EGCG)	166.7	mg
N-acetylcysteine	33.3	mg
Quercetin	8.3	mg
Selenium	5.0	µg
Copper	333.0	µg
Manganese	167.0	µg

Recommended allowance:

Adults: 2 capsules 3 times a day. Take at mealtimes with plenty of liquid (water, juice, tea).

Presentation: 180 capsules* per jar
Order No.: 019

* The capsule shell consists of hypromellose. Suitable for vegetarians.

Reconstructive Formula

EpiQuercican™ contains selected micronutrients in a synergistic combination. This Reconstructive Formula has been developed for combining with our range of Basic Formulas. It supplements the spectrum of micronutrients with other important factors supporting cell protection and normal cell function.
