

Lensivit™

Reconstructive formula to support normal eyesight

Maintaining a normal eye function is of great value for our general health and well-being. The functions of cells building our eyes and those involved in the vision process require a constant supply of micronutrients.

Science shows that various micronutrients and natural plant components are of utmost importance for supporting the function of the eyes: micronutrients are required for the cells building our eyes; for the optic nerve that carries the light signals from the cells of the eye to the brain; for the (ciliary) muscle cells that stretch and relax to control the focus of the lens; for the blood vessels responsible for supplying the eyes with oxygen and nutrients.

Specific micronutrients are also important for protecting the eye cells against oxidative stress.

A variety of micronutrients support and promote these natural functions:

- Vitamin A, for example, and a complex of carotenoids are important for maintaining normal eyesight.
- Lutein has a particular role in assuring healthy vision while vitamin C (especially as ascorbyl palmitate) and vitamin E help protect cell structures against oxidative stress.

Contents of one capsule:

Vitamin C from:		
Ascorbic acid	75.0	mg
Ascorbyl palmitate	6.3	mg
Vitamin A	100.0	µg RE
<i>(Beta carotene)</i>		
Vitamin E	22.6	mg
<i>(D-alpha-tocopherol)</i>		
Zinc	10.0	mg
Grape seed extract	50.0	mg
<i>(50% polyphenols)</i>		
L-arginine	40.0	mg
Blueberry extract	25.0	mg
L-cysteine	9.5	mg
Alpha lipoic acid	5.0	mg
Lycopene	5.0	mg
Lutein	4.2	mg
Pine bark extract	2.5	mg
Saffron-extract	1.5	mg
Zeaxanthin	1.5	mg
Mixed carotenoids	25.0	µg

Recommended allowance:

Adults: 1 capsule 2 times per day. Take at mealtimes with plenty of liquid (water, juice, tea).

Contents: 60 capsules* per container

Order No.: 047

* The capsule shell consists of hypromellose. Suitable for vegetarians.

Reconstructive Formula

Lensivit™ contains selected micronutrients in a synergistic combination. This reconstructive formula has been developed for combining with our range of basic formulas. It provides essential micronutrients and specific plant components with important factors to support normal eyesight.

Lensivit™ is a reconstructive formula in the Dr. Rath Cellular Nutrient Program. The ingredients in Lensivit™ support cellular metabolism in many ways simultaneously, e.g.:

- With vitamin A (beta carotene) and zinc to help maintain normal eyesight
- With zinc to support normal vitamin A metabolism
- With vitamin E, vitamin C and zinc to protect cells against oxidative stress
- With vitamin C, which helps to regenerate the antioxidant vitamin E
