

Dr. Rath's Phytobiologicals™

Basic Formula for supplementing the daily diet with biologically active plant substances

Phytobiologicals are biologically active substances that are found exclusively in plants. They serve mainly to protect and maintain plant metabolisms by exercising their strong antioxidant effects and by neutralizing bacteria, viruses and other injurious effects.

The human cellular metabolism obtains biologically active plant substances from food. These substances are components of a balanced diet that is rich in fresh fruit and vegetables. Thus, phytobiologicals, in addition to vitamins, minerals, trace elements, certain amino acids and essential fatty acids, play an important role in our daily micronutrient supply.

Dr. Rath's Phytobiologicals™ Basic Formula contains selected biologically active plant substances for supplementing the daily diet with cellular nutrients.

The Phytobiologicals Basic Formula includes extracts of green tea, extracts from the turmeric root, the vegetable substances resveratrol and quercetin, and an extract from cruciferous vegetables.

The vegetable active substances selected for Dr. Rath's Phytobiologicals™ Basic Formula make an ideal combination with the Vitacor Plus™ Basic Formula, by providing our bodies with the widest possible spectrum of beneficial nutrients.

Dr. Rath's Phytobiologicals™ is a Basic Formula in the Dr. Rath Cellular Nutrient Programme. The objective of Dr. Rath's Phytobiologicals™ formula is to provide the cells with the most comprehensive supply of cellular nutrients. Therefore, we recommend that Dr. Rath's Phytobiologicals™ Basic Formula be combined with the Vitacor Plus™ Basic Formula.

Contents of one capsule:

Green Tea Extract (80% Polyphenols).....	150	mg
Curcumin (from curcumin root)	150	mg
